

Trees for the Future

Presents This

Certificate of Tree Planting

Montana de la Virgen Thanks all

Gearchers and Gearch.com

A grove of trees is being planted for the benefit of an entire community and our environment

*This village project is being implemented to save the homes and way of life of the people in the community of Montana de la Virgen, **Honduras** an area devastated by deforestation and, increasingly, global climate change. This project will entail the planting of over 450 trees. These fast-growing, permanent, beneficial trees will protect these fragile and eroded lands and assure that families can continue to live in dignity and in harmony with the natural resources of their lands. Each year, these trees will remove several tons of pollution from the global atmosphere, replacing it with life-giving oxygen, while protecting lands and assisting the natural return of past diversity.*
